Communications Data Group Announces New Product

CHAMPAIGN, IL -- CDG is pleased to announce the addition of our new Hosted Backup Solution to our existing line of products and services. CDG's Hosted Backup Solution can help clients improve their data protection and recovery processes (including bare metal restores), while also providing the opportunity to create a new revenue stream down the road. Our Hosted Backup Solution utilizes an Internet connection to automatically replicate data from servers, desktops and laptops to our data center and offers continuous data protection, which can monitor your protected files for updates. The system provides local storage options to improve backup and restoration speeds, as well as integrated security and file encryption to protect data during transfer and storage. CDG's Hosted Backup Solution can perform standard folder and file backups, as well as database backups (MS SQL, Oracle, DB2 and MySQL), Microsoft Active Directory backups, and Microsoft Exchange backups.

About CDG:

CDG provides smart data solutions: CABS, Mediation, Customer Care, Plant, Trouble, Service Activation Manager, E-Care, company workflow management and third-party financial, mapping and facilities management products, business consulting and hosted back-up services. Full-service, online, and licensed options available. CDG can help you manage information, bill wisely, and grow your business.
