OSS/BSS Cloud Platform for Providers and Carriers

What is CDG Elements?

CDG Elements platform offers cloud-based, SaaS delivered OSS/BSS solutions for service providers and carriers seeking to grow their business, improve their BI, and develop innovations to increase their efficiencies.

What sets us apart?

We are operator-owned and operator-managed, with a singular mission to revolutionize the telecommunications industry by providing an operator-driven, innovative, and open-architecture OSS/BSS platform that empowers service providers and carriers to deliver exceptional services to their customers.

The Elements:

Operations, provisioning, ticketing, and order management.

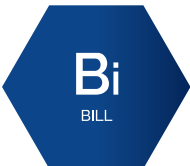

Business intelligence, insights, reporting, and analytics.

Subscriber care, POS, and system and member management.

Subscriber connect, support, generative AI, and engagement.

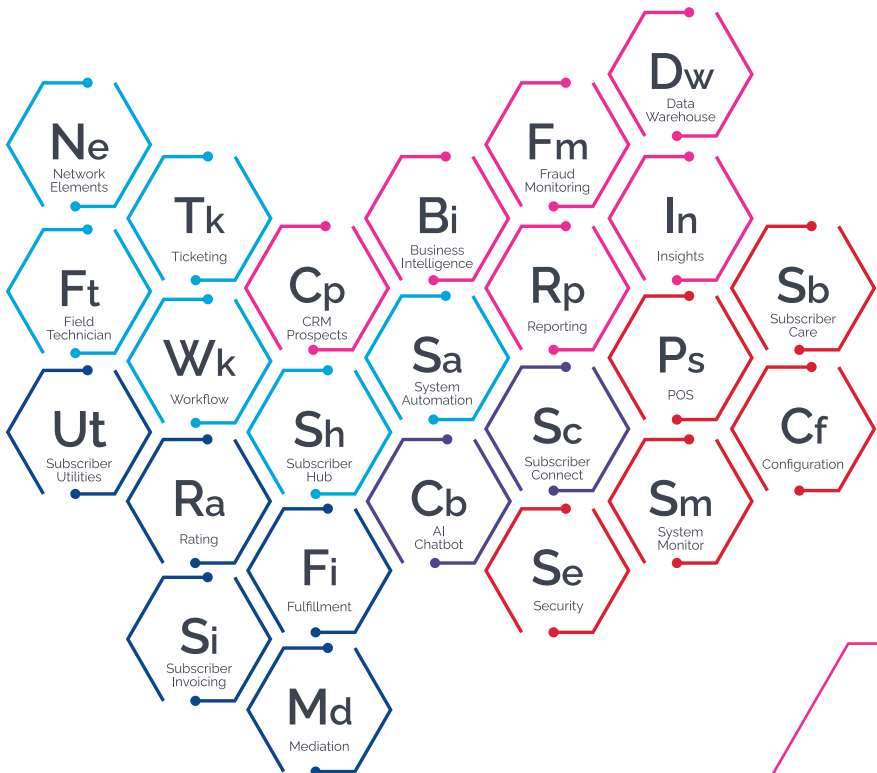

Record and batch processing, rating, invoicing, and fulfillment.

Industry-leading carrier access and wholesale management, service ordering, and billing.

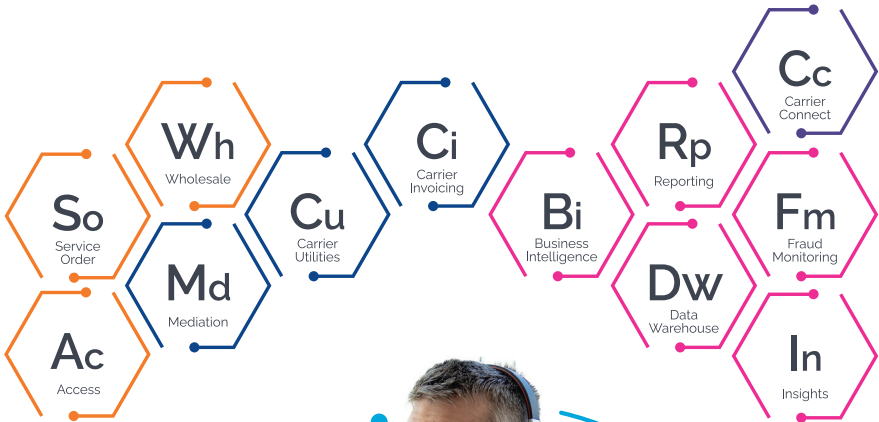

SUBSCRIBER ELEMENTS

Subscriber Elements provide solutions for service providers to manage their broadband and associated telecommunication services, evolve their business with AI-informed analytics, and engage their subscribers. Elements cover everything from subscriber management, invoicing, and business intelligence, with an open architecture for integrating other tools in your service ecosystem.

INTERCONNECT ELEMENTS

Interconnect Elements provide comprehensive ordering and billing solutions for Business Data Services, Ethernet virtual circuits, special access circuits, small cell sites, and dark fiber, as well as Interconnection and CABS billing functionality for both access tariffs and contracts. Our carrier solutions offer fully mechanized service order input and invoice outputs, meeting the ASOG and BOS industry standards that the largest carriers demand.

OUR CLIENTS

CDG Elements provides a complete platform customized for your management teams, customer service representatives (CSRs), sales, and technicians. Experience seamless integration designed to optimize your business operations and drive success.

TESTIMONIALS

CDG customers consistently have great things to say about our products and services.

CDG's MBS billing software has made my job easier and smoother. I can process twice as many service orders with MBS than I did with our old system. I have loved MBS from the start and with the upgrades and improvements that CDG keeps making, it just gets better!

- Citizens Telephone Corporation

CDG has been a trusted vendor of ours for more than 20 years. CDG's willingness to listen to our requests in addition to developing solutions that address industry changes make the CDG BDS-I system a robust and flexible billing platform that continues to meet our billing needs.

- TDS Telecom

As soon as we started to pitch ideas for things that we'd like to see, we found out just how much they were listening because the next thing we knew our idea would be in production in the application.

- Smartcom
