

# Elements - Evolve Carrier Connect

Manage your revenue instead of paper. Distribute your invoices and view current and past invoices, CSRs, and Bill Remittance documents all online with Carrier Connect.

## OVERVIEW

Carrier Connect allows companies to distribute Interconnection, BDS (Business Data Services), and other wholesale invoices to customers via a web-based portal. Using the Carrier Connect, clients can select from a menu of OBF and C/BOS standards that best suit their presentation preferences and distribute their invoices.

CDG is the product of choice for reliable, comprehensive BDS and Interconnect/access billing and offers a full product line of solutions, including data conversion management, integration, and records analysis and quantification.

## CARRIER CONNECT FEATURES

- Distribute BDS and Interconnection invoices via a web-based portal.
- Access current balance due information by account and invoice.
- View and print current and past invoices, CSRs, and Bill Remittance documents.
- Make and track CDR/usage requests by invoice to assist in centralizing and managing these events.
- Control the data and accounts that can be viewed for each carrier.
- Employs strict security controls that meet the most stringent audit requirements.
